

## MongoDB Installation (Catalina MacOS 10.15.3)

```
# Installs Homebrew  
/usr/bin/ruby -e "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/  
install/master/install)"
```

```
brew tap mongodb/brew
```

```
brew install mongodb-community
```

```
sudo mkdir -p /System/Volumes/Data/data/db
```

```
sudo chown -R `id -un` /System/Volumes/Data/data/db
```

```
brew services list = mongod-status
```

```
brew services run mongodb-community = mongod
```

```
mongo
```

```
brew services stop mongodb-community = mongod-stop
```
